DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

2. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-24, drawn to an antibody against a protein or peptide of ADAMST-13.
- II. Claims 25-27, drawn to a detection method of ADAMTS-13 with anti-ADAMTS-13 antibody.
- III. Claims 28-29, drawn to a process for purifying ADAMTS-13 using anti-ADAMTS antibody.
- IV. Claims 30-32, drawn to a diagnostic medicine or pharmaceutical product comprising the full-length sequence or a partially deleted variant of ADAMST-13.
- V. Claim 33, drawn to a method of preparation of an antigen for detecting an antibody or analyzing an epitope using the full-length sequence or a partially detected variant of ADAMST-13.

3. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Group V was found to have no special technical feature that defined the contribution over the prior art of U.S. Patent No. 7,037,658 (see entire document).

The U.S. '658 patent teach a composition suitable for administering ADAMTS13 to a patient suffering from TTP (see col., 58, lines 32-40 in particular).

Since Applicant's inventions do not contribute a special technical feature when viewed over the prior art they do not have a single general inventive concept and so lack unity of invention.

4. The application contains claims directed to the following patentably distinct species of the claimed Inventions I: wherein disease is:

Art Unit: 1644

A. SEQ ID NO: 1, B. SEQ ID NO: 2 or C. SEQ ID NO: 3.

These species are distinct because their structure and physiochemical characteristic are different, and represent patentably distinct subject matter.

Applicant is required under 35 U.S.C 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maher Haddad whose telephone number is (571) 272-0845.
